

Dedicated Managed Servers

ARE YOU LOOKING FOR A STABLE HOSTING PLATFORM FOR YOUR (WEB) BUSINESS?

DO YOU WANT TO HOST YOUR WEB APPLICATIONS AND/OR DATABASES ON YOUR OWN ENVIRONMENT?

DO YOU WANT TO BE FREE OF HARDWARE AND CONTROL SYSTEM WORRIES?

DO YOU WANT TO BE UP-TO DATE AT ALL TIMES AS SECURITY AND SOFTWARE UPDATES ARE CONCERNED?

DO YOU WANT TO HAVE YOUR SERVER MONITORED 24/7 AND DO YOU WANT POSSIBLE DISTURBANCES SOLVED 24/7?

Introduction Dedicated Managed Servers

For large websites or with specific demands as the configuration is concerned it might be important to have your own server at your disposal. Our product, dedicated managed hosting, ensures a stable hosting environment. We manage the hardware and software administration so that you can focus completely on the websites or the applications that have to be run on your server.

Nxs Internet takes care of the installation, security updates, software updates and 24/7 proactive monitoring. Solving hardware and software disturbances and doing server backups are included. In case of a malfunction we are available 24/7 on a special emergency number. We support both Linux and Windows environments.

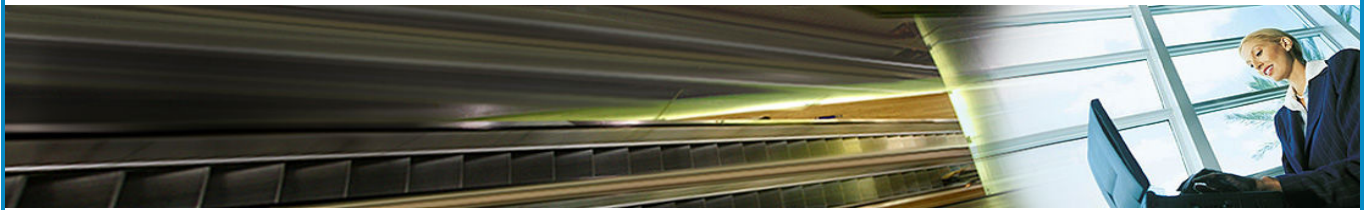

The advantages of dedicated managed hosting:

Do not worry about the hardware of your server

The lease of a solid server is included. Nxs Internet has years of experience in buying, installing and administering various server configurations. We use 'Dell' systems for this purpose. Part of the dedicated server contract is the guarantee that computer parts will be replaced when needed. If for instance a disk, memory, main board or other part is not working properly, you can rely on us repairing the system in its original state. There will be no surcharges for the hardware parts and working hours.

Do not worry about the maintenance of your server

If you do not have the knowledge or you wish to stick to your own specialities, you can let us take care of the configuration or maintenance of a server. We can install the dedicated server for you after consultation. Moreover, we can take care of the periodical

Basic configurations

A – Dell M600 blade server in a M1000e modular enclosure

Quad Core Intel Xeon L5420 2,5 GHz
2 x 1 GB Dual Rank Dimm
2 x 73 GB SAS 10.000 rpm 2,5" Hot Plug Raid-1
Hardware Raid controller

B – Dell M600 blade server in a M1000e modular enclosure

Quad Core Intel Xeon L5420 2,5 GHz
2 x 2 GB Dual Rank Dimm
2 x 73 GB SAS 15.000 rpm 2,5" Hot Plug Raid-1
Hardware Raid controller

C – Dell M600 blade server in a M1000e modular enclosure

2 x Quad Core Intel Xeon L5420 2,5 GHz
2 x 4 GB Dual Rank Dimm
2 x 73 GB SAS 15.000 rpm 2,5" Hot Plug Raid-1
Hardware Raid controller

D – Dell PowerEdge 2950 III

Quad Core Intel Xeon L5420 2,5 GHz
2 x 2 GB Dual Rank Dimm
4 x 146 GB SAS 10.000 rpm 2,5" Hot Plug Raid-5
Hardware Raid controller
There is space for 8 x 2,5" hard drives (74 GB SAS 15k or 146 GB SAS 10k) or 6 x 3,5" hard drives
(All hard drives are available in 7,2k or 15k).

❖ All systems are extendable up to 32 GB memory.
