**DO YOU WANT A PARTY THAT ANSWERS THE PHONE AT ALL TIMES AND THAT ANSWERS ALL OF YOUR QUESTIONS?**

**HAVE YOUR DOMAIN REGISTERED BY NXS!**

### Introduction Domain registration

Many internet activities begin with a domain name. Nxs enables you to administer the registration and removals of your domains easily and ensures you a flexible service at a very attractive price.

Nxs has been valued for years for its fast domain registration. Besides, you can modify the configuration of each domain in the self-developed customer administration system, like for instance a modification in the zonefile.

### The advantages of domain registration with Nxs:

Registration and removal on your own (company) name

Every domain that you request with us will be registered on your own (company) name in the WHOIS. You then will be owner of the domain and you will have full control in case of a mutation, cancellation or removal. You can, off course, claim the common extensions, besides we also offer the possibility to register domain names with over 250 different extensions.

Independent zonefile administration

You can adapt the zonefile of your domain independently and then modify the IP references. You can modify, add and delete A, CNAME, MX, AAAA and NS records. Modifications will be activated immediately on to our name servers.

Mail forward creation for every domain

You can forward your mail for every domain to an existing e-mail address. For more e-mail options order the additional E-mail package.

Optional use of own name servers

If you have your own name servers, let us know when you order. Make sure that they are configured correctly. It also possible to take care of your own primary name server and have us take care of the secondary name server.

Furthermore, you can have your name servers modified for free. You do not have any idea what name servers are? Just follow the general configuration instructions as stipulated in the order system.

Free use of fallback mail server

If you have your own mail server, use our fallback mail server service for free. Should your own mail server temporarily be unavailable, we will file your new e-mails until your server functions again.
